## Kinds & Cats

Our world is full of animals. Our Creator, the Lord Jesus Christ, made about 1,500 different kinds of animals. Each land animal kind was saved on the Ark and repopulated Earth after the Flood.

Air and sea animals were created on Day 5 of the creation week.

Land animals were made on Day 6, the same day as people.

Each animal kind can have a great variety of species. One such kind is the cat kind.

God created animals with the ability to fill environments all over Earth, and now there are over two million species of animals!

House cats usually weigh about 10 pounds.

Most tigers live in India, but some live in Russia and

Southeast Asia. Some weigh over 600 pounds. That's one big kitty! Saber-toothed cats became extinct during the Ice Age about 4,000 years ago.

Most leopards live in Africa, but some live in Europe and Asia.
